

Autodesk InfraWorks Essentials

1 Day Course

Who Should Attend?

This course is designed for experienced 3D Engineers/Technicians who are comfortable working in a 3D environment, who have a need to produce 3D models that incorporate a wide variety of data to enable the production of a design proposal.

Delegates should have a basic knowledge of computers. It is also recommended that delegates have a working knowledge of design or GIS software and workflow.

Objectives

The objective of this course is to familiarise design professionals in the use of Autodesk InfraWorks with an Infrastructure bias to establish existing conditions using both 2D/3D data and GIS data and to start the design process using the design modules available with InfraWorks.

Agenda

Note: We normally train on the latest version.

During the course delegates will cover:

Agenda Topics:

- Introduction to Autodesk InfraWorks
- User Interface
- Data Import
- Model Builder
- Model Creation
- Roads Module
- Bridge Module
- Drainage Module
- Style features
- Proposal Creation
- Analysis
- Storyboards

The above may be varied to suit client's preferences and requirements.

Qualifications

On completion of the course you will be presented with an Autodesk Authorised Training Certificate.
