

Unit J – Autodesk Vehicle Tracking Training

1 Day Course

Who Should Attend?

This course is designed for Engineers and technicians who have a requirement to complete vehicle swept paths and parking layouts.

Delegates should have a working knowledge of AutoCAD.

Objectives

The primary objective of this course is to provide users with an overview of the features and functions of Autodesk Vehicle Tracking.

Agenda

Note: We normally train on the latest version.

During the course delegates will cover:

Agenda Topics:

- Navigating the Autodesk Vehicle Tracking Working Environment
- Vehicle Tracking Settings
- Using the Vehicle Library, Creating and Editing Vehicles
- Positioning, Driving and Parking a Vehicle
- Analysis Tools
- Editing Swept Paths
- Parking Bay Layout Tools
- Reports
- Animation
- Tracking Surfaces demonstration
- An Overview of the Junction and Roundabout Tools

The above may be varied to suit client's preferences and requirements.

Qualifications

On completion of the course you will be presented with an Autodesk Authorised Training Certificate.
