

## Who Should Attend?

This course is designed for Autodesk Revit users who want to learn more about template creation and company standards.

Delegates should have completed the Revit MEP New User course or have equivalent experience using Revit MEP. Design, drafting or engineering experience is also highly recommended. Delegates must have a working knowledge of Microsoft operating systems.

## Objectives

The primary objective of this course is to help delegates understand template management.

## Agenda

This course covers template creation, understanding what needs to be included, how to create re-usable Revit data, and how to store and reuse this. The course also outlines the system management that is required when working with Revit.

**Note:** We normally train on the latest version.
