AUTODESK BUILD QUICK START

www.cadline.co.uk

cadline

a *vinzero*™ company

Overview

Autodesk Build puts critical information into the hands of the key people on a construction project, helping to improve quality, safety, commissioning and tracking for capital projects of all types.

The objective for this quick start is to deliver an Autodesk Build environment, configured to enable your project team to access the latest information and manage construction activities effectively such as safety, quality, requests for information, submittals and more.

SPEAK TO ONE OF OUR SPECIALISTS: **0330 551 9420**

Session 1 - Scoping and Review of Existing Workflows

- Review of current data management system, typical drawings and models

SPEAK TO ONE OF OUR SPECIALISTS: **0330 551 9420**

Advanced support

Our Autodesk Build experts are on hand to help you manage, adopt and extend your system beyond implementation. Project data, files and models are an expanding and growing asset and we are there to offer the right advice as the demands on your environment increase. Further interoperability issues may be a consideration as will the need to extend access to field based users. Support includes:

- Ongoing file and data structure
- Model federation
- Project configuration
- User access and permissions
- Mobile access and extending project use
